Ground Red Chilli

GLOBAL TRADE, LOCALIZED EASE

PRODUCT NAME

Cumin Seeds

HSN Code: 090931

(Cuminum cyminum)

PRODUCT DESCRIPTION

Cumin (Botanical Name: Cuminum cyminum) is well-known by its common name "Jeera" and is considered to be one of the most vital and widely traded spices in the world. Cumin, with its unique aroma, pungent taste, and rich nutrient content, is an integral part of the cuisine in Asia, Middle East, North Africa, and Latin America. We serve diverse international markets by offering cumin seeds in various purity grades, like Singapore quality and Europe / USA quality to meet specific regulatory and culinary requirements. Our cumin seeds are carefully cleaned, graded, and hygienically packed to preserve natural aroma, flavour and freshness for the global food industries, spice manufacturers and importers.

KEY PRODUCT HIGHLIGHTS

- Distinctive Aroma
- Sortex Cleaned
- 99%–99.5% Purity
- Europe / USA & Singapore Grades

TECHNICAL SPECIFICATIONS

Parameter	Export Specification
Origin	Gujarat/Rajasthan, India
Purity	99% to 99.5% (Sortex Cleaned)
Moisture	8% to 10% Max
Volatile oil	2.5% to 4.0%
Foreign Matter	1% Max

PRODUCT NAME

Turmeric Fingers

HSN Code: 091030

(*Curcuma longa*)

PRODUCT DESCRIPTION

Turmeric (*Curcuma longa*), commonly known as the "Golden Spice," is famous worldwide for its rich yellow colour, earthy fragrance, and active compound, curcumin. Turmeric fingers are obtained by boiling and drying the roots and stems of the turmeric plant. We offer some of the most sought-after Indian commercial varieties, including Salem, Nizamabad, Rajapuri, and Erode.

KEY PRODUCT HIGHLIGHTS

- Naturally Rich Golden Colour
- Multiple Indian Varieties
- Whole Export-Grade Rhizomes
- Carefully Selected Quality

TECHNICAL SPECIFICATIONS

PARAMETER	SPECIFICATION
Form	Dried, unpolished or polished rhizomes
Curcumin Content	2% - 5% (Up to 7%+ for premium pharma grades)
Moisture	8% to 10% Max
Flexibility	Hard and solid (snaps cleanly)
Origin	Tamil Nadu, Andhra Pradesh, or Maharashtra

PRODUCT NAME

Fennel Seeds

HSN Code: 090961

(*Foeniculum vulgare*)

PRODUCT DESCRIPTION

Fennel seeds are also called saunf. The plant name of fennel is *Foeniculum vulgare*. Fennel seeds are perennial herbs characterized by sweet taste and aroma like that of liquorice. India is the leading producer of fennel in the world, whereas Gujarat state and Rajasthan are ideal locations for cultivation of fennel seeds due to their high productivity with good quality production of volatile oil.

KEY PRODUCT HIGHLIGHTS

- Sweet Liquorice-like Aroma
- Sortex Cleaned
- Europe / Singapore Grades

TECHNICAL SPECIFICATIONS

PARAMETER	SPECIFICATION
Quality Grade	Europe Grade / Singapore Grade
Purity	98% to 99.5% (Sortex Cleaned)
Moisture	8% to 10% Max
Colour	Bright Green / Pale Green
Volatile Oil	1% to 2%

PRODUCT NAME

Coriander Seeds

HSN Code: 090921

(*Coriandrum sativum*)

PRODUCT DESCRIPTION

Coriander Seeds (Scientific Name: *Coriandrum sativum*) are popularly known as "Dhania" and are one of the most ancient and popularly used spices in the world. These seeds are well-known for their delicate and sweet taste with a slightly citrus flavour and act as a basic ingredient in international recipes, spice mixes, and the preparation of essential oils. India is the center of production of these seeds and we source the finest coriander seeds from the best growing areas of Rajasthan and Gujarat. Coriander seeds are graded based on their colour, purity, and the percentage of split seeds. We offer precisely cleaned Eagle quality, Scooter quality, and Parrot/Single Parrot quality.

KEY PRODUCT HIGHLIGHTS

- "Dhania"
- Delicate and sweet taste with a slightly citrus flavour
- International recipes, spice mixes, and the preparation of essential oils

TECHNICAL SPECIFICATIONS

Parameter	Specification
Product Name	Whole Coriander Seeds (Sortex Cleaned)
Quality Grades Available	Eagle (100% split-free), Scooter, Single Parrot, Double Parrot
Purity	98.0% to 99.5%
Foreign Matter	1.0% Max
Moisture Content	8% to 10% Max
Volatile Oil Content	0.25% to 1.2% Min

PRODUCT NAME

Red Chilli

HSN Code: 090421

(*Capsicum annuum*)

PRODUCT DESCRIPTION

India is undoubtedly the global champion in the production and export of Dry Red Chillies (Botanical Name: *Capsicum annuum*). Noted for their naturally red colouring and different heat varieties, Indian chillies are an essential part of international cooking, spices, and Oleoresin industries.

Red chillies are not a "one size fits all" commodity. Here are the three types of Indian red chilli that we serve, depending on different needs for pungency (heat) and ASTA content: Sannam S4(S334), Teja S17, Byadgi.

KEY PRODUCT HIGHLIGHTS

- Multiple Heat Profiles
- Natural Red Colour
- Different heat varieties
- ASTA & SHU Options

TECHNICAL SPECIFICATIONS

Parameter	Export Specification
Varieties	Teja, Sannam, Byadgi
Pungency (Heat)	15,000 to 90,000 SHU (depends on variety)
Colour Value (ASTA)	80 to 150 ASTA
Moisture	2% Max
Defective/Discoloured	10% Max

PRODUCT NAME

Ground Cumin

HSN Code: 091099

PRODUCT DESCRIPTION

High-quality sun-dried cumin seeds from Gujarat and Rajasthan. Our cumin powder is manufactured using cutting-edge cool-milling (low-temperature grinding) technology, which prevents the loss of volatile oils while retaining the finished powder's trademark warm, earthy, and nutty aromatic profile. Rare earth magnets and metal detectors support enhanced food-safety controls.

KEY PRODUCT HIGHLIGHTS

- Cool-milling (low-temperature grinding)
- Retaining volatile oils
- Rare earth magnets and metal detectors

TECHNICAL SPECIFICATIONS

Parameter	Specification
Colour/Appearance	Greyish Brown
Flavour/Aroma	Strongly aromatic, warm, and characteristic of fresh cumin
Volatile Oil Content	1.0% to 1.5% Min (Crucial for aroma and flavour retention)
Moisture Content	9.0% Max
Total Ash	8.0% to 9.5% Max
Acid Insoluble Ash	1.5% Max
Granulation/Mesh Size	60 to 80 Mesh (Custom milling available up to 100 Mesh)

MICROBIOLOGICAL / SAFETY INFORMATION

Salmonella: Absent in 25 g
E. coli: Negative / <10 CFU/g
Total Plate Count (TPC): <50,000 CFU/g (Steam sterilized options available for stricter limits)

PRODUCT NAME

GROUND TURMERIC

HSN Code:091030

PRODUCT DESCRIPTION

The turmeric powder we offer is a beautiful natural golden yellow colour, derived from dried turmeric fingers from Salem, Erode or Nizamabad varieties. It is processed in controlled facilities with low heat grinding to retain the maximum amount of essential oils and curcumin content.

KEY PRODUCT HIGHLIGHTS

- Natural golden yellow colour
- Low heat grinding
- Retains essential oils and curcumin content

TECHNICAL SPECIFICATIONS

Parameter	Specification
Curcumin Content	2.0% to 5.0% (Customizable based on buyer/pharma requirements)
Total Ash	7% Max
Moisture	10% Max
Acid Insoluble Ash	1.5% Max
Granulation/Mesh Size	60 to 80 Mesh (Fine powder)

MICROBIOLOGICAL / SAFETY INFORMATION

100% Free from Lead Chromate and artificial yellow dyes.
Aflatoxin (B1, B2, G1, G2) strictly within EU MRLs (Total < 10 ppb).
Salmonella & E. coli: Absent

PRODUCT NAME

GROUND RED CHILLI

HSN Code: 090421

PRODUCT DESCRIPTION

Our red chilli powder is ground from a mix of high-quality whole chillies – mainly Teja, Sannam, and Byadgi – that provide the best balance of bright red colour and spiciness, allowing us to customise it for different needs, from low to high colour (like paprika) to very hot. These specifications are catered to both extract and spicy food markets.

KEY PRODUCT HIGHLIGHTS

- High-quality whole chillies
- Bright red colour and spiciness
- Customise it for different needs

TECHNICAL SPECIFICATIONS

Parameter	Specification
Pungency/Heat (SHU)	10,000 to 100,000+ SHU (Custom blended to buyer specification)
Colour Value (ASTA)	60 to 140 ASTA
Moisture	10% Max
Total Ash	8% Max
Acid Insoluble Ash	1.5% Max
Granulation/Mesh Size	40 to 60 Mesh

MICROBIOLOGICAL / SAFETY INFORMATION

100% Free from Sudan I-IV dyes and added synthetic colours. Pesticide residues and Aflatoxins strictly compliant with EU/USFDA standards.

PACKAGING & SHIPPING
