About us

EXPORTING
EARTH'S
FINEST
WORLDWIDE

At CHS International, we are your best partner in high-end agricultural exports. We are dedicated to exporting some of the most exotic spices from India with a rich agricultural background. The company is committed to the highest standards of quality and compliance with international commerce and ensures that the flavours of the region reach kitchens around the world. The essence of the company's work is to link the outstanding farming capabilities of local producers to strict international requirements in the sphere of spices trading. Through intensive quality control, safe logistics and good relationships with buyers, the company can make sure that each shipment bears the mark of genuine Indian agriculture.

OUR MISSION

To consistently provide authentic high-grade spices to our global partners via dependable supply chains, transparent trade practices and an unyielding commitment to product excellence.

OUR VISION

To become the world's most trusted partner in agricultural exports by delivering authentic Indian spices with absolute reliability, uncompromising quality, and full regulatory compliance. We aim to share India's rich culinary heritage with kitchens across the globe while building lasting international relationships.

Sourced with Care.
Processed with Precision.
Delivered with Integrity.

From trusted farms to global kitchens,
we ensure purity, safety, and
consistency at every step.

FARM TO EXPORT

1

SOURCING

Sourced from trusted farmers

2

SELECTING

Careful selection of the finest crops at peak maturity.

3

CLEANING

Multi-stage cleaning to remove the impurities

4

PROCESSING

Advanced gridding and processing to retain natural oils and aroma.

5

QUALITY CHECK

Rigorous testing at every stage for quality and consistency.

6

PACKAGING

Packaging for freshness and long life

7

EXPORT

Reliable global logistics ensuring one-time delivery worldwide.

Cumin Seeds

Cumin (Botanical Name: *Cuminum cyminum*) is well-known by its common name "Jeera" and is considered to be one of the most vital and widely traded spices in the world. Cumin, with its unique aroma, pungent taste, and rich nutrient content, is an integral part of the cuisine in Asia, Middle East, North Africa, and Latin America.

We serve diverse international markets by offering cumin seeds in various purity grades, like **Singapore quality** and **Europe / USA quality** to meet specific regulatory and culinary requirements.

Our cumin seeds are carefully cleaned, graded, and hygienically packed to preserve natural aroma, flavour and freshness for the global food industries, spice manufacturers and importers.

Parameter	Export Specification
Origin	Gujarat/Rajasthan, India
Purity	99% to 99.5% (Sortex Cleaned)
Moisture	8% to 10% Max
Volatile Oil	2.5% to 4.0%
Foreign Matter	1% Max

Turmeric Fingers

Turmeric (*Curcuma longa*), commonly known as the "Golden Spice," is famous worldwide for its rich yellow colour, earthy fragrance, and active compound, curcumin. Turmeric fingers are obtained by boiling and drying the roots and stems of the turmeric plant. We offer some of the most sought-after Indian commercial varieties, including **Salem, Nizamabad, Rajapuri, and Erode.**

Our whole turmeric fingers are as authentic as it gets. We specifically look for harvests with naturally high curcumin level so you get that rich flavour and stunning golden colour without any artificial help. Because honesty is a core part of how we do business. Our turmeric, sourced from India's agricultural regions, meets international food standards, making it an ideal choice for spice processors, cosmetics companies, and nutraceutical industry.

Parameter	Export Specification
Form	Dried, unpolished or polished rhizomes
Curcumin Content	2% - 5% (Up to 7%+ for premium pharma grades)
Moisture	8% to 10% Max
Flexibility	Hard and solid (snaps cleanly)
Origin	Tamil Nadu, Andhra Pradesh, or Maharashtra

Red Chilli

India is undoubtedly the global champion in the production and export of Dry Red Chillies (Botanical Name: *Capsicum annum*). Noted for their naturally red colouring and different heat varieties, Indian chillies are an essential part of international cooking, spices, and Oleoresin industries.

Red chillies are not a "one size fits all" commodity. Here are the three types of Indian red chilli that we serve, depending on different needs for pungency (heat) and ASTA content: **Sannam S4(S334), Teja S17, Byadgi.**

Our strict quality control ensures our chillies are sun-dried to perfection and graded free of aflatoxins, meeting the strict import requirements of the EU, USA, and Middle East markets.

Parameter	Export Specification
Varieties	Teja, Sannam, Byadgi
Color Value (ASTA)	80 to 150 ASTA
Pungency (Heat)	15,000 to 90,000 SHU (depends on variety)
Moisture	10% Max
Defective/Discolored	2% Max

Fennel Seeds

Fennel seeds are also called saunf. The plant name of fennel is *Foeniculum vulgare*. Fennel seeds are perennial herbs characterized by sweet taste and aroma like that of liquorice. India is the leading producer of fennel in the world, whereas Gujarat state and Rajasthan are ideal locations for cultivation of fennel seeds due to their high productivity with good quality production of volatile oil.

We offer precision-cleaned grades fennel like **Europe / USA Quality, Singapore Quality**. Fennel seeds for export go through a process of harvesting, drying, and sorting to ensure quality. The worldwide market for fennel seeds is quite expansive.

Parameter	Export Specification
Quality Grade	Europe Grade / Singapore Grade
Purity	98% to 99.5% (Sortex Cleaned)
Moisture	8% to 10% Max
Color	Bright Green / Pale Green
Volatile Oil	1% to 2%

Coriander Seeds

Coriander Seeds (Scientific Name: *Coriandrum sativum*) are popularly known as "Dhania" and are one of the most ancient and popularly used spices in the world. These seeds are well-known for their delicate and sweet taste with a slightly citrus flavor and act as a basic ingredient in international recipes, spice mixes, and the preparation of essential oils. India is the center of production of these seeds and we source the finest coriander seeds from the best growing areas of Rajasthan and Gujarat.

Coriander seeds are graded based on their color, purity, and the percentage of split seeds. We offer precisely cleaned **Eagle quality**, **Scooter quality**, and **Parrot / Single Parrot quality**.

Parameter	Specification
Product Name	Whole Coriander Seeds (Sortex Cleaned)
Quality Grades Available	Eagle (100% split-free), Scooter, Single Parrot, Double Parrot
Purity	98.0% to 99.5%
Moisture Content	8% to 10% Max
Volatile Oil Content	0.25% to 1.2% Min
Foreign Matter	1.0% Max

GROUND CUMIN

High-quality sun-dried cumin seeds from Gujarat and Rajasthan. Our cumin powder is manufactured using cutting-edge cool-milling (low-temperature grinding) technology, which prevents the loss of volatile oils while retaining the finished powder's trademark warm, earthy, and nutty aromatic profile. Rare earth magnets and metal detectors ensure absolute food safety.

Physical & Chemical Specifications:

Color / Appearance: Greyish Brown

Flavor / Aroma: Strongly aromatic, warm, and characteristic of fresh cumin.

Volatile Oil Content: 1.0% to 1.5% Min (Crucial for aroma and flavor retention).

Moisture Content: 9.0% Max.

Total Ash: 8.0% to 9.5% Max.

Acid Insoluble Ash: 1.5% Max.

Granulation / Mesh Size: 60 to 80 Mesh (Custom milling available up to 100 Mesh).

Microbiological Safety:

Salmonella: Absent (in 25g).

E. Coli: Negative / <10 cfu/gm.

Total Plate Count (TPC): < 50,000 cfu/gm (Steam sterilized options available for stricter limits).

GROUND TURMERIC

The turmeric powder we offer is a beautiful natural golden yellow colour, derived from dried turmeric fingers from Salem, Erode or Nizamabad varieties. It is processed in controlled facilities with low heat grinding to retain the maximum amount of essential oils and curcumin content.

Physical & Chemical Specifications:

Curcumin Content: 2.0% to 5.0%+ (Customizable based on buyer/pharma requirements)

Moisture: 10% Max

Total Ash: 7% Max

Acid Insoluble Ash: 1.5% Max

Granulation / Mesh Size: 60 to 80 Mesh (Fine powder)

Safety Guarantees:

100% Free from Lead Chromate and artificial yellow dyes.

Aflatoxin (B1, B2, G1, G2) strictly within EU MRLs (Total < 10 ppb).

Salmonella & E. Coli: Absent.

GROUND RED CHILLI

Our red chilli powder is ground from a mix of high-quality whole chillies - mainly Teja, Sannam, and Byadgi - that provide the best balance of bright red colour and spiciness, allowing us to customise it for different needs, from low to high colour (like paprika) to very hot. These specifications are catered to both extract and spicy food markets.

Physical & Chemical Specifications:

Pungency / Heat (SHU): 10,000 to 100,000+ SHU (Custom blended to buyer specification)

Color Value (ASTA): 60 to 140 ASTA

Moisture: 10% Max

Total Ash: 8% Max

Acid Insoluble Ash: 1.5% Max

Granulation / Mesh Size: 40 to 60 Mesh

Safety Guarantees:

100% Free from Sudan I-IV dyes and added synthetic colors.

Pesticide residues and Aflatoxins strictly compliant with EU/USFDA standards.

PACKAGING & SHIPPING (APPLICABLE TO ALL GROUND SPICE & SEEDS)

MOQ: 1 MT (Metric Ton) (Applicable to all Ground Spices and Seeds)

Bulk Packaging: 10 kg, 20 kg, or 25 kg Multi-wall Kraft paper bags or High-Density Polyethylene (HDPE) bags with food-grade inner poly-liners to prevent moisture ingress and aroma loss. (Whole seeds also available in new Jute/PP bags).

Custom Packaging: Custom packaging and vacuum packing available upon request.

Documentation: Every shipment is accompanied by a Certificate of Analysis (COA) from an ISO/NABL accredited laboratory (e.g., SGS, Eurofins), a Phytosanitary Certificate, and a Certificate of Origin.
